PROFESSIONAL SUMMARY

A detail-oriented Software Engineer and Backend Developer with a B.Sc. (Hons) in Software Administration and Information Systems. An experienced in developing systems, websites and applications using Java/Spring Boot and Python/Django, designing REST APIs, and deploying containerized applications with Docker. Strong skills in software engineering, cybersecurity, and web development.

WORK HISTORY

Technical consultant | Legacy League Technologies - Kazan

07/2026 - current

- Designed bespoke tech solutions to enhance customer satisfaction and address specific needs.
- Assessed and documented architecture of Laravel 10/PHP application, providing insights for optimisation.
- Analysed existing systems to pinpoint improvement opportunities, driving better performance.
- Improved client satisfaction with timely resolution of their technical concerns.
- Created detailed project reports, ensuring transparency in project progress.

Junior Java Backend developer trainee | Sberbank - Kazan

01/2025 - 06/2025

- Completed Sber's Java Backend Development training program, developing a personal finance management REST API with Java, Spring Boot, PostgreSQL, JPA/Hibernate, and Spring Security. Implemented JWT authentication, CRUD operations, exception handling, data validation, and user-specific financial analytics, while applying layered architecture, OOP principles, Git-based development, and automated testing.
- Developed skills rapidly through hands-on practice in daily tasks, enhancing problem-solving capabilities.
- Applied critical thinking to analyse problems, evaluate solutions, and make informed decisions that improved project outcomes.
- Enhanced work efficiency by actively learning and applying new skills to streamline processes.

SKILLS

- Java
- Python (Django)
- REST API development
- API Development
- PostgreSQL
- Git/Github
- Software Development
- Linux
- Systems Design
- IT governance

EDUCATION

Kazan National Technological Research University - Kazan, Russian Federation

2021 - 2026

David Kaunda National Technical Secondary School – Lusaka, Zambia

2017 – 2019

Horizon School Lusaka

2015 - 2016

Bachelor of Science: Mathematical Software and Administration of Information Systems - Honours

- Graduated with **Distinction**, achieving a **4.87/5.0 GPA**.
- Recipient of the **Russian Government Scholarship**.
- **Honoured by the institute** for academic achievement and performance.
- Completed additional professional training in **Java Backend Development through Sber**, with practical experience in Java, Spring Boot, PostgreSQL, Spring Security, and REST API development.
- Completed a Microsoft Junior C# Engineer certification.
- Completed coursework toward the **Cisco Junior Cybersecurity Analyst** certification path, developing foundational skills in network security, cybersecurity, and threat analysis.
- Pursued additional training in **Python and software development** through Google and other professional learning platforms.
- Developed and deployed **Erva Learn**, a full-stack educational platform, as a major academic/software engineering project using **Python, Django, React/Next.js, PostgreSQL, Docker, and AI-powered services**.
- Participated in university and extracurricular technical projects involving **web development, cryptography, cybersecurity, and software engineering**.
